13th
Ave

Adair St

Exit to Plaza

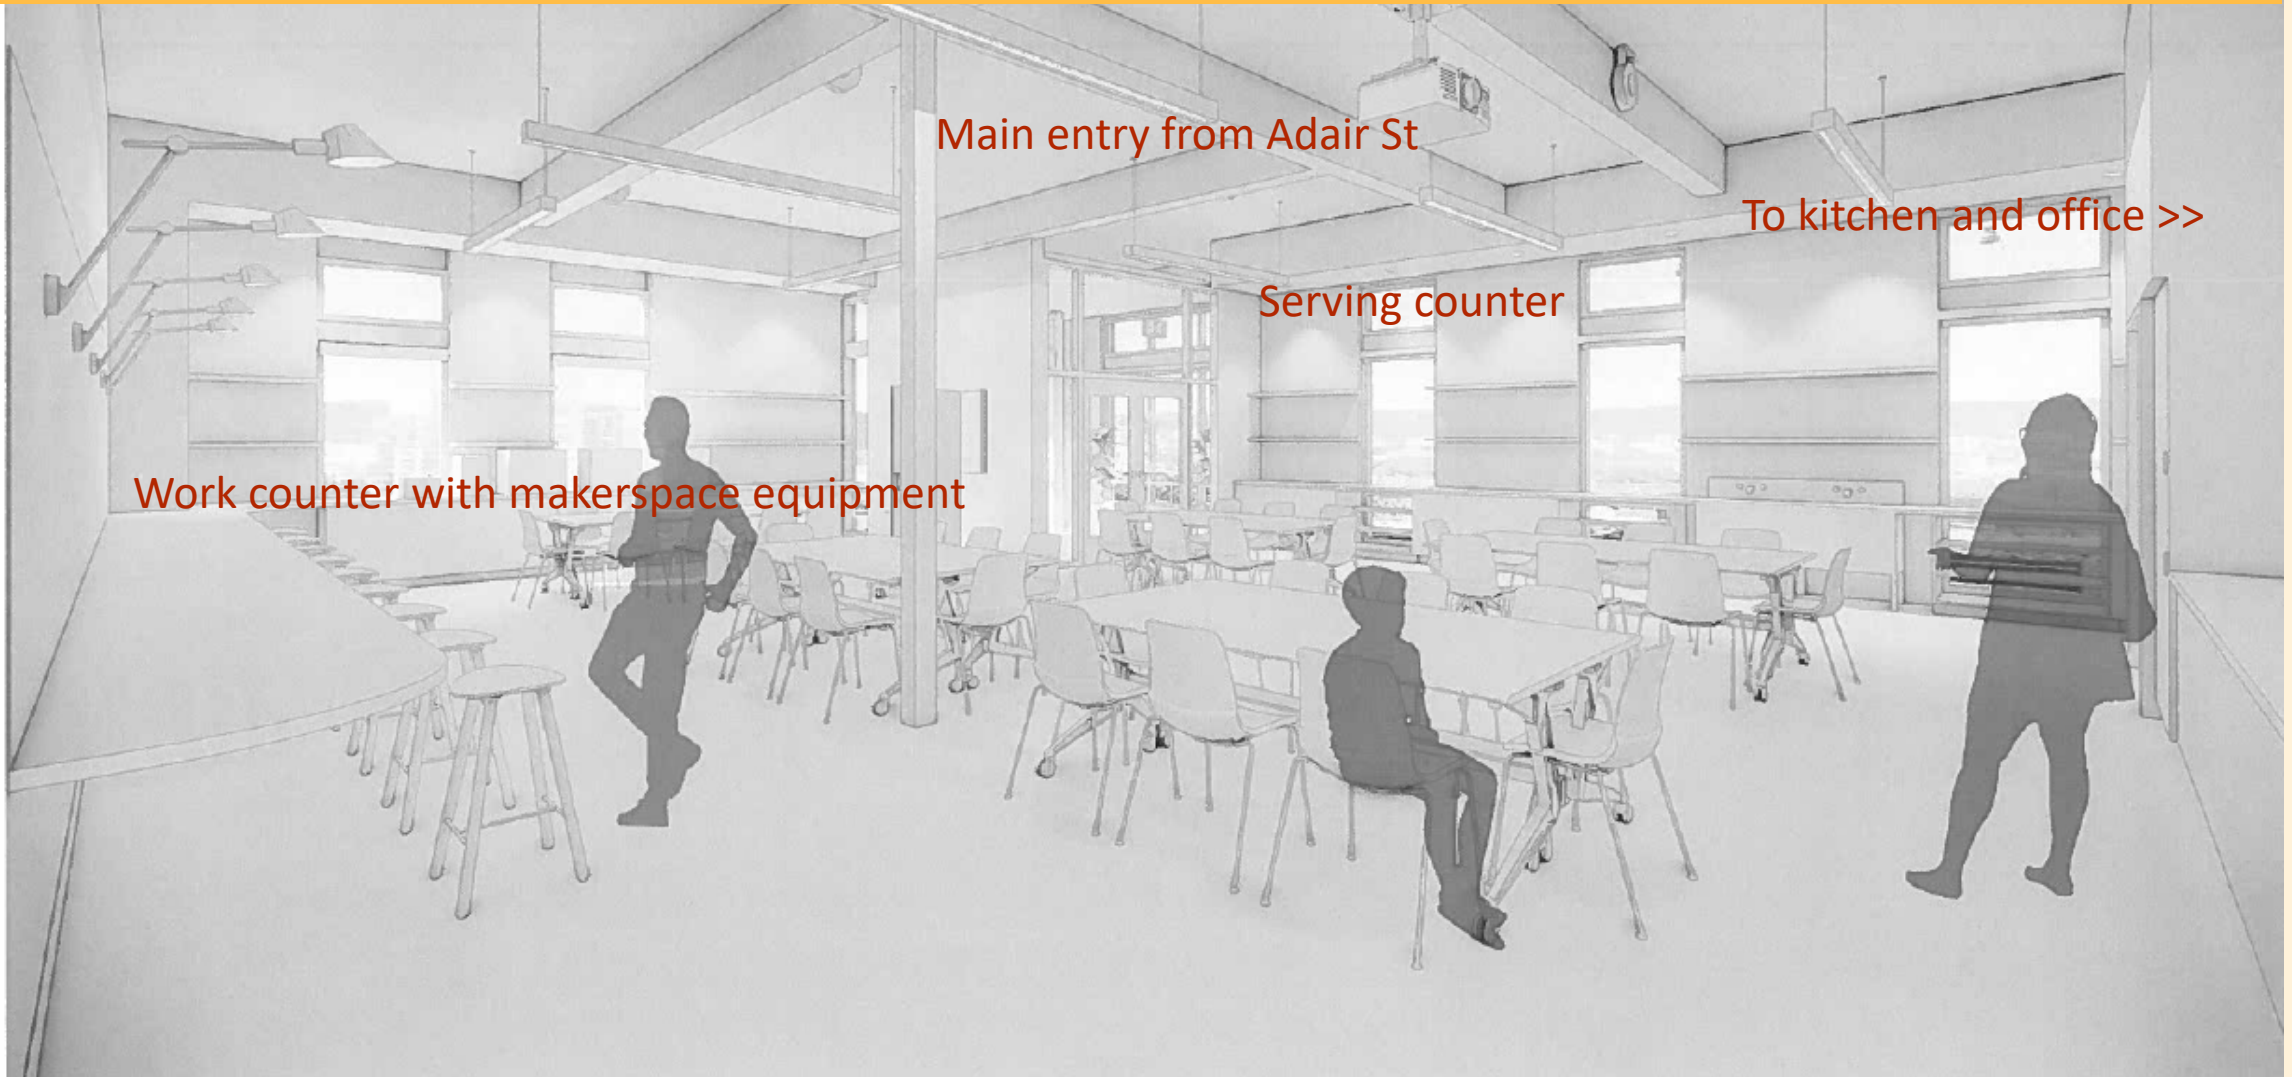

Existing Library

What is a Makerspace?

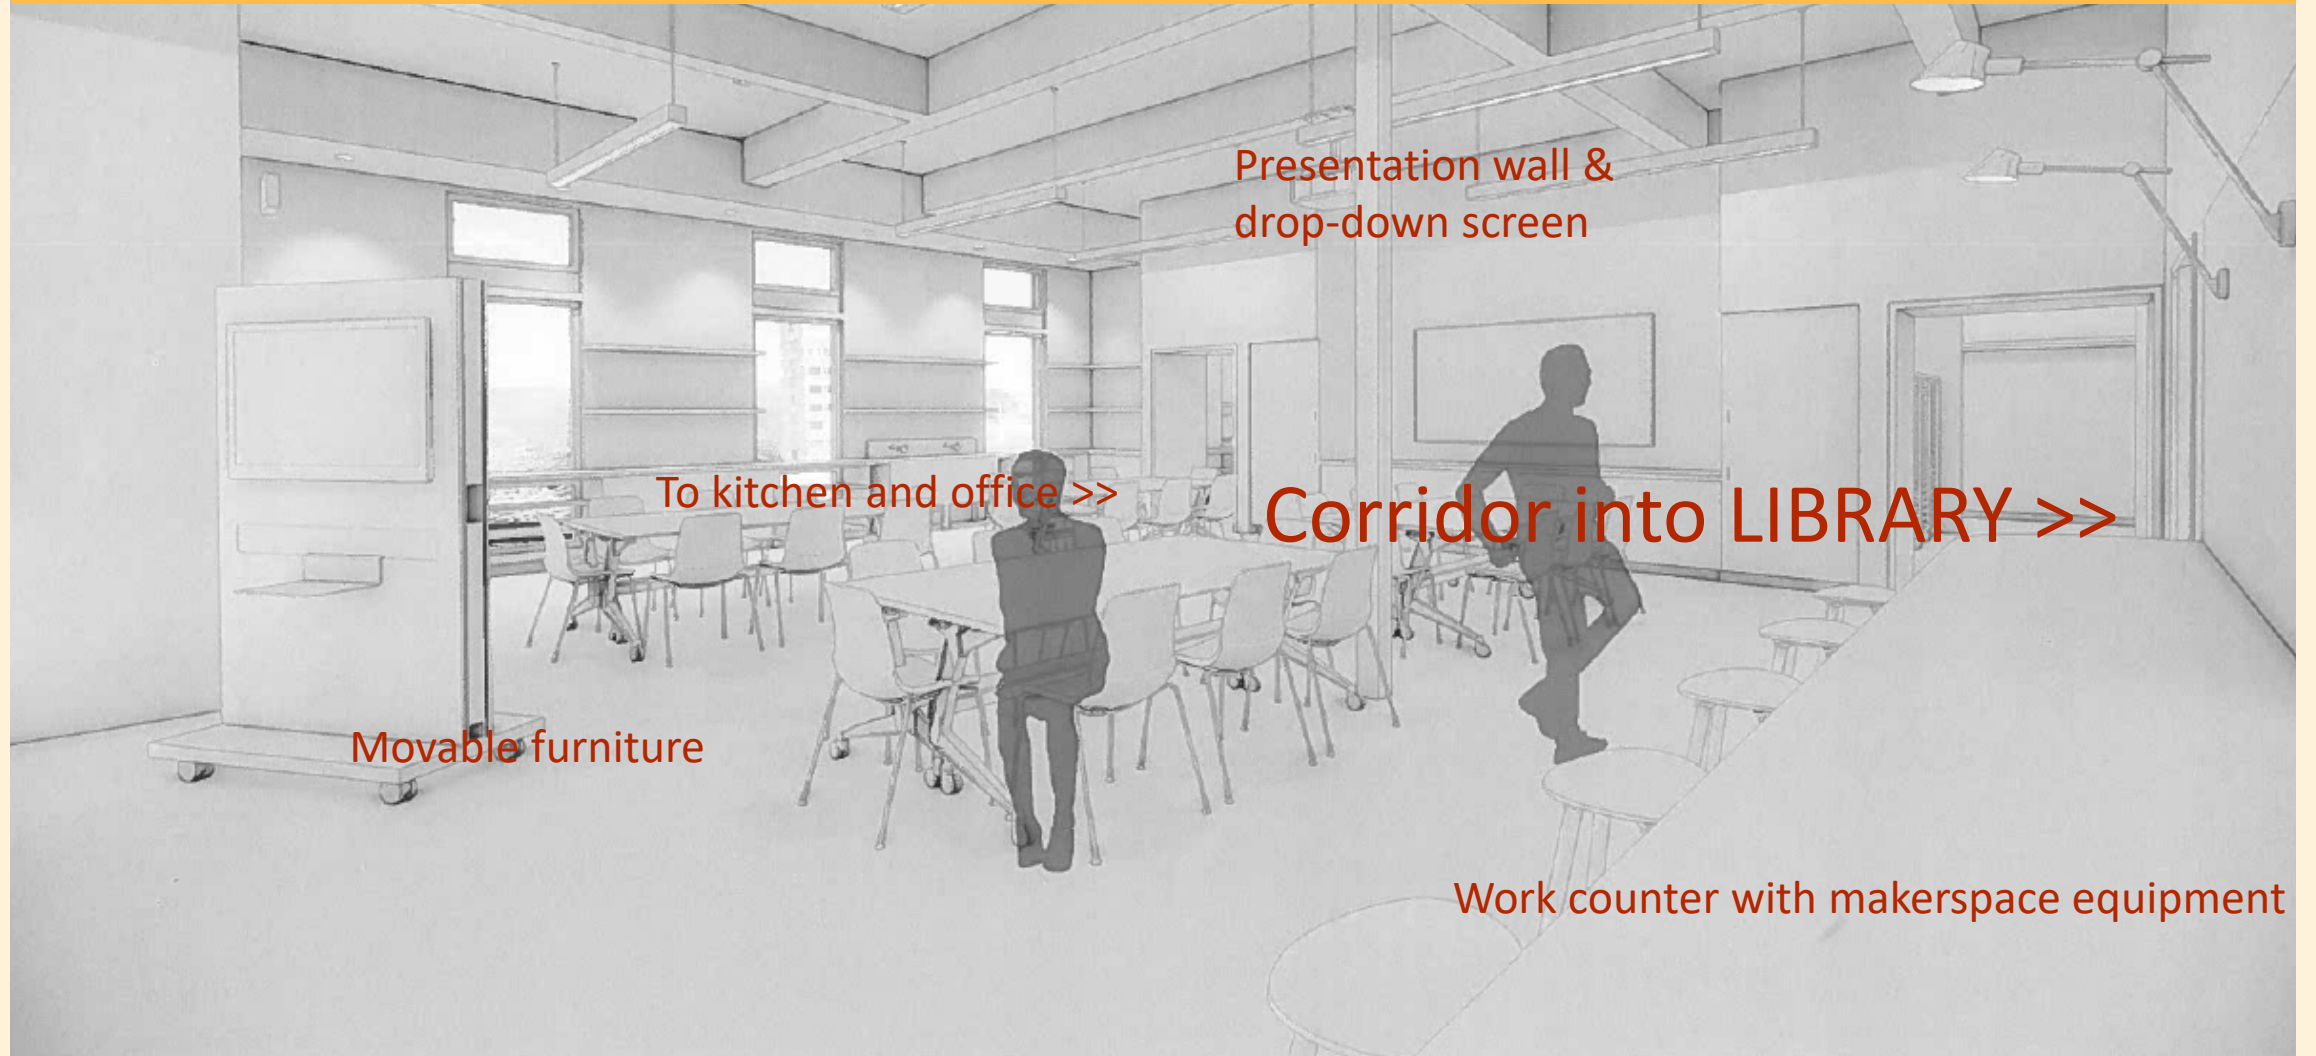

- Our makerspace will be a place where youth in the community can explore science, technology, engineering, and math (STEM) concepts with educational hands-on activities.
- Class visits, library workshops, and community partners will have access to things like a 3D printer, kiln, laser cutter, heat press, multi-media tools, and much, much more.
